## PROJECTS

### Breast Cancer Prediction Model

- Built a machine learning model using Logistic Regression and Random Forest
- Achieved high accuracy through proper data preprocessing and feature scaling
- Evaluated model using accuracy, precision, and recall metrics. [link](#)

### AI Chatbot using Gemini API

- Developed an AI chatbot using Generative AI and LangChain
- Integrated custom dataset using RAG (Retrieval-Augmented Generation)
- Built simple user interface using Streamlit. [link](#)

### Sales Data Analysis Dashboard

- Cleaned and analyzed dataset using Pandas
- Created visual dashboards using Power BI
- Generated actionable insights for decision-making. [link](#)

### ML Web App Deployment

- Built end-to-end ML application with prediction functionality
- Deployed using Streamlit for real-time user interaction. [link](#)
